

2018-2019 Regional Demand Occupation List Region 4

The Targeted Occupations List is produced by using Florida's statewide and local area demand occupations list received from the Department of Economic Opportunity's Bureau of Labor Market Statistics. We review labor market information and solicit input from our board members which represent the broad cross-section of industries in our community and our economic development partners. Occupations are added upon request when the Board approves and annual openings and wages meet required levels. Occupations are removed by the Board when annual openings and wages fall below acceptable levels.
